

NPK 12-8-11

Complex mineral fertilizer

This product contains 12% N (nitrogen) of which 1% is NO_3 and 11% NH_2 . Furthermore, the product contains 8% P_2O_5 (phosphor); 11% K_2O (potassium); MgO (magnesium) and a number of trace elements such as iron, boron manganese, molybdenum and copper.

Besides the single N, P, and K fertilizers Bio Nova also offers a complete N-P-K combination in the ideal proportions of **NPK 12-8-11**. This combination is especially qualified for soil and hydro-cultivations and makes for an ideal combination with other mineral fertilizers and trace elements.

NPK 12-8-11 is very economic.

NPK 12-8-11 does not contain any excess ingredients and works very rapidly.

A dosage of 1:1000 increases the total amount of N by 9.5 mmol; the amount of P by 1.4 mmol and the amount of K by 3 mmol.

DOSAGE:

Depending on the used combinations the dosage should be 10-30 ml. per 10 liters of water.
